DIGITAL DENTISTRY AT CENTEX

The future of dentistry is digital and it is bright. We've evolved the way we think, communicate and work at Centex Dental Lab, so you can take advantage of our digital scan, design, and mill workflow and make restorative treatments more accessible and efficient than ever before.

- High quality design by skilled and efficient craftsmen.
- Scanning capabilities for complete digital design.
- Design and milled custom implant solutions.
- 100% Full-Contour Zirconia Crowns and Bridges.
- Porcelain overlay options.

WELCOME TO CENTEX DENTAL LAB

Our business was established in 1953, specializing in removable appliances. We have expanded our services by offering the latest technology of Digital Dentistry.

- Digital Dentures - The only lab in our area with the AvaDent System.
- Digital Impressions - We have the capability to accept a wide range of "intraoral scans".
- From the simple question to the complex case planning, our knowledgeable technicians are only a phone call away.
- Personalized service including chair side consultations.
- Over 100 hybrid denture case conversions completed.
- 3 Certified Dental Technicians with over 80 years of combined experience.
